EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Richard Turner (Reg. # 29,710) at 202-663-7935 on April 14, 2005. The purpose of the examiner's amendment was to put the claims in the allowable condition.

2. The application has been amended as follows:

In claim 1:

- Line 15: -- generated at the time of braking as Joule heat -- has been inserted after "overheat".

3. The following is an examiner's statement of reasons for allowance:

With regard to claim 1, the prior art does not teach or render obvious the combinations as claimed vehicle controller performing overheat detection on a resistor of an electric vehicle that consumes power generated at a time of braking as Joule heat including:

- A resistance value calculating means; and
- Overheat detecting means for comparing the resistance value calculated by the resistance value calculating means and a resistance value at an allowable temperature of the resistor, and judging that overheat generated at a time of braking as Joule heat is detected from the resistor when the resistance value

calculated by the resistance value calculating means is larger than the resistance value at an allowable temperature of the resistor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
